Notes			
1. The battery capacity is 97 kWh at a discharge rate of C/3, which has been certified by the MIIT (The Ministry of Industry and Information Technology of the People's Republic of China).			
2. Data were obtained from internal estimation and multiple mock tests. The actual range may vary depending on factors such as vehicle configuration, outdoor temperature, weather conditions, passengers, load, terrain, driving style, speed, road conditions, use of air conditioning, etc.			
3. Seat material only refers to the material of the main part of the seat that contacts with the human body in the normal sitting condition of passengers. Please refer to the vehicle for the exact material distribution.			
4. The interior colour and material distribution shall be subject to the actual vehicle.			
*The battery range and charging time vary depending on the actual use			
*Unless otherwise noted, the performance parameters in the table may vary due to different experimental conditions.			
*The specification list is only for reference, and HiPhi is constantly upgrading its products, and the features of products may change accordingly. Please refer to the actual vehicle as the final basis for details.			
*HiPhi has the right to explain and reserve the right to change the technical parameters, specifications and other product information within the scope permitted by laws and regulations.
